

eTSS - Electronic Time Sheet Solution and Quickbooks Integration

eTSS and QuickBooks make a terrific combination for employee time tracking and payroll processing. You can easily configure eTSS to send all employees' time worked to any QuickBooks solution. As a Premier Development Partner of Intuit, GHG has created a seamless integration between QuickBooks and eTSS. This two-way link of information communicates important Time and Expense data directly to QuickBooks for accurate Payroll or Billing (Invoicing) purposes.

GHG's eTSMS software was designed using three basic principles:

- Easy Implementation
- Expected Performance
- Exceptional Value

eTSS and Quickbooks

- Web-Based access for employees, supervisors and payroll personnel.
- Captures bill rates and pay rates by each hour worked/charged on timesheet.
- Configurable time sheet (weekly, bi-weekly, semi-monthly monthly.)
- Access to drop down list of all applicable Jobs and Labor Categories on timesheet.
- Individual setup (job allocation) for each user.
- Billable and non-billable pay items.
- Enter time directly to Jobs or utilize Web Clock to track employee's in/out transactions.
- Detailed audit trail on timesheet captures all changes/update to each employee's timesheet.
- Submit, approve, and lock timesheets once processed for payroll.
- Reminders and notifications sent to employees, supervisors and administrators.
- Allows client access and approval for customers with 3rd party approval requirements

eTSS Additional Features

- Interfaces with time clock hardware
- Automatically computes hours worked
- DCAA compliant
- GSA contract available
- Available in purchased or hosted version
- Leave balance management
- Online pay stub information
- Company-wide bulletin board
- Employee scheduling
- Allows data to be exported to text files, spreadsheets
- Available to employees and management from any Internet enabled computer
- Tracking, management, and accounting of employee time on multiple projects
